

Aquacare Solutions Enviro Engineers

"NEW LAUNCH"

"STP In Box"

STP In Box is a Packaged MBR Plant System for Sewage Treatment.

**Plug-and-Play
Packaged
MBR STP**

What Is STP In Box

Aquacare's MBR STP In Box system is a packaged/containerised system, compact energy optimised solution includes high performance MBR technology for sewage treatment produces clear water to reuse.

MBR STP In Box system consists of biological treatment, MBR for filtration sludge handling system and disinfection. Tanks, piping's, pump & blowers designed to suits the sewage application.

Operation

Aquacare's MBR STP In Box system is designed to provide biological and filtration system to treat sewage. The system can achieve 96% recovery with treated water quality of BOD <10ppm, TSS<5 ppm and Turbidity<1 NTU.

Treatment Capacity-Aquacare's MBR STP In Box system is available in capacities as 5 KLD,10KLD,20 KLD & 30 KLD. Box Size- 20 Ft (Easy to Ship Anywhere..)

Key Features & Benefits

- Compact System
- Plug & Play
- Suitable - Fixed & Temporary usage
- Meets Regulatory Requirements

Value Additions

- Above Ground Installation
- Cost efficient in Capex & Opex
- Robust Design - with minimal maintenance
- Easy to change in location as per requirements

Advantages

- Environment Friendly - Meeting discharge norms
- Less Time for Installation - Ready to USE
- Handling emergencies
- Low Maintenance & Operating costs
